Webinar: Improving Mathematical Problem Solving in Grades 4 through 8

Why is including problem solving in daily instruction so important?

What research-based recommendations are available to teachers on engaging students in problem solving?

Learn about:

- The relationship between the Virginia Standards of Learning, the National Council of Teachers of Mathematics' Process Standards, and the Common Core State Standards for Mathematical Practice.
- The importance of including problem solving in daily middle school mathematics curriculum.
- Recommendations from IES Practice Guides:
 - ◇ *Improving Mathematical Problem Solving in Grades 4 through 8*
 - ◇ *Assisting Students Struggling with Mathematics: Response to Intervention (RtI) for Elementary and Middle Schools*

Presenter:

- Dr. John Woodward, Dean, School of Education, University of Puget Sound
